TOLERANCE

Tolerance has been defined as "the capacity of endurance." It presupposes defects and faults. Reduced to its last analysis, it is the application of the Golden Rule. If everyone were perfect, there would be such deadly perfection in the world that it would be unbearable. We would all be alike—exactly alike. We love our fellow man because he approaches our ideal of perfection—because of his efforts to rise above his downward inclinations. No two men think exactly alike, but each may be honest in his convictions. The other man's conclusions should be respected, even though he differs from us, for we may be wrong. No man should be made to suffer because he does not think as we do whether it is in religion, politics or morals. Tolerance is the basis of the boycott, and the boycott is despicable. Religion and politics are the right and left hand of intolerance. They have arrayed father against son and son against brother. They have brought on murders and wars. If improperly used they are the greatest barriers to civilization, just as they are the greatest aids to progress if based on tolerance. Tolerance fosters friendship; intolerance begets hatred. Tolerance makes for calm consideration; intolerance brings revolution. Tolerance creates statesmen; intolerance is the mother of tyrants. Tolerance forgets self and considers the other man; intolerance is the glorification of the Ego.

IN THE COUNTRY.

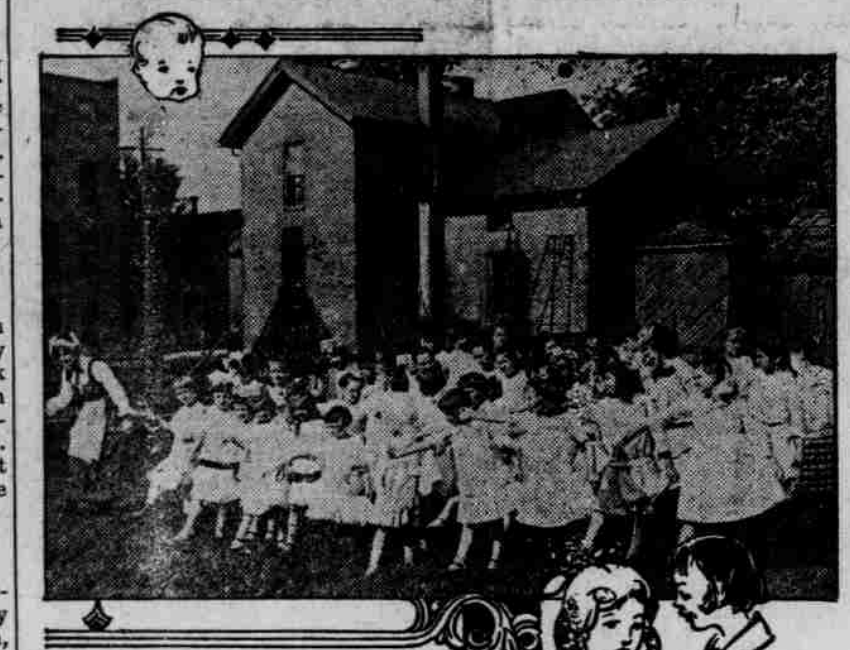

Sunday Monday and Tuesday all pleasant days. Monday morning a great change was noticeable among the farmers—the long drawn faces that had for weeks looked on the soaking shocks of wheat as a dead loss, discouraged tread was quickened—everything took on a cheerful business look. Threshing machines steaming in teams were hurriedly put to work—useless pocketed hands grasped the various implements with energy and the wheat was found in much better condition than was expected. Fred Schang was out before three a. m. Tuesday morning preparing to go to his wheat field near Elmina bringing back loads of rescued wheat. The threshing machine was running again on the fly. Tuesday's threshing turned out over fifty bushels to the acre. Every thing looks hopeful now—a new life seems infused by these days of sunshine. Everybody looks happy.

Brakeman Was Cured. P. A. Wootsey, Jacksonville, Texas, writes: "I was down with kidney trouble and rheumatism; had a backache all the time and was tired of living. I took Foley Kidney Pills and was thoroughly cured." Thousands have written similar letters. Foley Kidney Pills are tonic in effect and act promptly. Fink & Haussner.

TRACTOR DEMONSTRATION. Saturday, August 28, 1915, is date of the big demonstration of the uses of tractor engines on the farm. Plowing, wheat cutting, hay making and loading, corn cultivation and other farm work are all possible uses of the tractor engine. This new power is likely to revolutionize farm work.

At a recent demonstration in Illinois, thousands of farmers were present. Some came from points five and six hundred miles distant. The farmers of Putnam, Paulding, DeKalb and Henry counties have been anxious to have such a demonstration in Ohio. Already they have secured the promise of several companies to show their tractors. Speakers from the College of Agriculture and the State Experiment Station will be secured to lecture upon the benefits of deeper plowing, better drainage, rotation of crops, uses of fertilizer, etc.

The demonstration will be made just outside the corporation limits of Continental. The citizens of that town will be equal to the task of properly entertaining all visitors.

THE BOOSTERS CROWN.

I never wrote a famous play
Like those that Shakespeare wrote,
Nor yet in verse or roundelay
Struck the Miltonic note;
I never painted anything
Like Michaelangelo,
Nor does my oratory ring
Like that of Cicero.
Upon the stage I must confess
I'm not a second Booth,
Nor yet do I pretend to dress
Like Beau Brummel in truth;
No symphonies have I composed
To rival Herr Mozart,
Nor nature's secrets have disclosed
With Luther Burbank's art.
No continents have I explored
Like Ponce De Leon,
Nor led the conquering horde,
As did Napoleon;
No master of finance am I,
As Rockefeller is;
In science I do not qualify
With the late Agassiz.
At statesmanship I must admit
I'm not a Tellerand;
On no inventions have I hit
With Edison's command;
Yet on my tomb to renown,
That mine was not a knocker's creed—
"HE BOOSTED HIS HOME TOWN."
